INTRODUCTION / BACKGROUND

Wi-Tribe, launched in 2009 under Qatar Telecom (Ooredoo), entered Pakistan's broadband market with WiMAX technology, offering wireless internet services to homes and small businesses. Despite a strong start and by becoming the top service provider in **2011**, the brand failed to sustain its position due to outdated technology, poor service quality, and weak customer engagement.

As competitors like Nayatel, PTCL, and StormFiber adopted advanced fiber and LTE solutions, Wi-Tribe struggled to innovate, leading to declining user trust and eventual market exit. Wi-Tribe effectively ceased operations in Pakistan in mid-2020. The Pakistan Telecommunication Authority (PTA) later formally terminated Wi-Tribe's license in **October 2021**

AVERAGE SENTIMENT ANALYSIS

There is a clear decline in public opinion from 2015 to 2019. Beginning with a strong positive majority ($\approx 66\%$) and minimal negative feedback in 2015, the company suffered a **critical erosion of goodwill**, resulting in **negative sentiment dominating at approximately 56%-57%** and positive sentiment plummeting to its lowest point ($\approx 13\%-14\%$) by 2018-2019.

ROOT CAUSES OF FAILURE

1. Wrong Technology Choice

Wi-Tribe invested heavily in WiMAX, an older technology, while the industry rapidly shifted to 4G LTE and Fiber-to-the-home (FTTH). Their network couldn't match competitors, leading to a significant disadvantage.

3. Lack of Strategic Innovation

While competitors innovated, Wi-Tribe showed strategic inertia. They failed to diversify or reposition offerings, losing market relevance and brand perception over time.

5. Limited Coverage

Unlike national competitors, Wi-Tribe was restricted to major cities, limiting scalability and market penetration. They couldn't expand fast enough to compete effectively.

2. Poor Customer Service

Sentiment graphs show negative mentions surging. Users consistently highlighted poor response times, unresolved complaints, and untrained staff, eroding brand trust and driving customers away.

4. Weak Competitive Position & Pricing

Initially a leader in 2011, Wi-Tribe's outdated WiMAX technology made plans seem overpriced compared to fiber-based rivals. They were squeezed by larger telecom giants and faster fiber providers.

6. PTA License Termination

The Pakistan Telecommunication Authority (PTA) terminated Wi-Tribe's license due to its failure to provide "uninterrupted licensed services," stemming from a commercial dispute with edotco over unpaid tower service fees.

K-MEANS STYLE SEGMENTATION

Cluster	Size	Key Traits	Description
2	67	Highest income, good internet usage, average streaming	Professionals / high-income users: likely willing to pay for fast and stable internet
1	66	Lower income, low ISP satisfaction, average usage	Budget-sensitive users: unhappy with their current provider, likely to switch if pricing is attractive
3	49	Lowest income, medium satisfaction, average usage	Students / young users: limited budget but use internet regularly
0	18	Highest internet budget, most devices at home, high WFH rate	Work-from-home power users: require strong speed and reliability and are ready to invest

Wi-Tribe’s ideal customers can be categorized as follows:

- **Students**
- **Freelancers & Remote Workers**
- **Tech-Savvy Professionals**
- **Home-Based Families**

Most Valuable Segment for Wi-Tribe Relaunch
Based on revenue potential + reliability demand:

- **Cluster 0: WFH Power Users**
 - Many devices at home
 - High dependency on internet for work
 - Highest monthly budget
 - Will pay more if Wi-Fi is fast and stable

MISSION

"Empowering connected living through fast, affordable, and reliable internet solutions for every Pakistani."

VISION

"To set the golden standard of connectivity in Pakistan, creating a digital ecosystem where uninterrupted speed fuels ambition and loyalty is always rewarded."

THE 4P's

PRODUCT: WHAT'S NEW AND IMPROVED

Wi-Tribe must relaunch as a "Reliable Urban Broadband Brand" with clear improvements:

1

Technology Upgrade

Introducing 5G-ready fixed wireless and a selective Fiber To The Home rollout in high-demand areas. Modern Wi-Fi 6 routers will be standard, bundled with all new packages.

2

Transparent & Consistent Speeds

We guarantee 80-90% of advertised speeds even during peak hours. Customers will have access to a real-time speed monitoring dashboard within their mobile app.

3

Faster Onboarding

Same-day installation for fixed-wireless zones and plug-and-play CPE delivery within 24 hours to ensure immediate connectivity.

4

Customer-First Approach

24/7 customer support via multiple channels, including WhatsApp, with guaranteed quick ticket resolution. Outage compensation credits will build trust and differentiate Wi-Tribe.

5

Flexible Home & Business Plans

Tailored bundles for home users (streaming, gaming, WFH) and businesses (static IP, dedicated bandwidth, 4-hour fault handling SLA).

THE 4P's

PRICE (Updated + Competitor Comparison)

Package Name	Speed	Price	USP
Vibe Lite	25 Mbps	2,999	Student-focused
Wi-Tribe Gold	35 Mbps	3,699	Normal Package
Family Flow	50 Mbps	4,999	Family package
Gamer's Den	75 Mbps	6,699	Static IP

Add-On Services

Add-On Service	Price	Description
Smart Home Bundle (CCTV + IoT)	2,500 / month	Installation included
Backup Wireless	500 / month	Auto-activation upon fiber failure
Cloud Storage Suite	300 / month	Antivirus + 500GB cloud backup
Premium Support	999 / month	24/7 support & priority escalation

THE 4P's

PLACE (Target the cities with easiest penetration)

Initial Launch Cities (Blue Ocean Market)

Instead of directly competing in saturated major cities, our relaunch strategy focuses on "blue ocean" markets where competition is weak, and the opportunity for rapid growth is high. This approach allows us to establish a strong foothold before expanding.

1

Bahawalpur

Weak broadband competition (PTCL/Nayatel presence limited). Growing middle-class population. Offers an early adopter advantage for fast market capture.

2

Sargodha

Limited high-speed internet options make it ideal for a hybrid fiber + wireless service. Lower marketing costs needed for customer acquisition due to unmet demand.

3

Multan

A large population of students and gamers drives high demand for speed and specialized packages. Excellent for targeting gaming and streaming bundles, fostering brand loyalty among young users.

THE 4P's

PROMOTION (Low cost, high engagement)

1 Hyperlocal Digital Advertising

Utilizing Facebook & Instagram geo-targeted ads with a 3-5 km radius around serviceable zones for maximum relevance and efficiency.

2 Influencer Micro-Marketing

Partnering with niche micro-influencers (5k-50k followers) such as tech reviewers and gamers to build authentic community engagement.

3 Community Engagement: "Speed Test Challenge"

Hosting free trial booths at local events, inviting potential customers to participate in a "Speed Test Challenge" to showcase Wi-Tribe's performance.

4 In-App Rewards Program

Implementing a comprehensive points system: +50 points for learning courses, +25 for using in-app AI tools, +10 for daily logins, +5/day for streaks, and bonus points for high monthly data usage (+350 for 150GB, +550 for 250GB).

5 Special Discounts & Offers

Offering attractive incentives like a "Switcher Offer" (15% off for 3 months) and a "12-Month Prepaid" deal (2 months free) to drive adoption.

6 Door-to-Door Demos in Premium Communities

Conducting personalized, hands-on demonstrations of our hybrid fiber + wireless technology directly to residents in target communities.

7 Gamers & Students Segment Activation

Sponsoring local esports tournaments to gain high visibility and loyalty within the highly engaged gaming and student communities at our target locations.

Total Cost Per Home Installation

Cost Component	Amount (PKR)	Notes
Fiber drop cable + accessories	6,000	Covers the 150 meters of fiber used
Router/ONT Cost (Updated)	6,730	Based on 24\$ USD
Labor (2 technicians)	3,000	
Other Installation Overhead	4,500	Transport, handling, backend/admin
Total Per-Home Installation Cost	16,500	Excluding the CAC
Customer Acquisition Cost (CAC)	3,000-4,000	The marketing/sales cost
Total Cost to Acquire & Connect	20,000 - 20,500PKR	(Installation + Router + Mid-range CAC)

Router Pricing Strategy	Option A: Freedom Plan (Installments)	Option B: Boss Deal (Upfront Cash)
	- Upfront: 3,000 PKR 315 PKR/month × 12 - Recovery time: 12 months	- Pay 2 months in advance - Free router + installation - Recovery time: 1 month

Overall Investment & Recovery

Households connected initially:
≈ 300-480

Install cost:
7,920,000 PKR

Marketing + transport:
5,700,000 PKR

Total Investment :
13,620,000 PKR

Monthly revenue:
1,680,000 PKR

Recovery time:
≈ 10 months

FUTURE FORECASTING

Metric	Year 1 (6,000 Subs)	Year 2 (30,000 Subs)	Year 3 (80,000 Subs)
Total Annual Revenue (A)	252,000,000 PKR	1,209,600,000 PKR	3,108,000,000 PKR
Total Annual OpEx (B)	100,800,000	483,840,000	1,243,200,000
Gross Profit (A-B)	151,200,000	725,760,000	1,864,800,000
Profit Margin (Gross) %	60.0%	60.0%	60.0%
Initial Investment Recovery	14,726,144	0	0
EBIT Margin (Adjusted) %	54.1%	60.0%	60.0%
